This email comes from an external source, so remember, Think Before You Click!  
Sure Gary,

You can add the pointer without Card History since you don't store the AKA State Doc Type and AKA Real ID.

Thanks,  
Asma

---

**From:** Gary Tancik [<mailto:Gtancik@resdat.com>]  
**Sent:** Tuesday, July 18, 2017 12:11 PM  
**To:** Syeda, Asma <[ASyeda@aamva.org](mailto:ASyeda@aamva.org)>  
**Cc:** Mina Peters, AK Dept. of Administration <[mina.peters@alaska.gov](mailto:mina.peters@alaska.gov)>; Singaraju, Sruti <[ssingaraju@aamva.org](mailto:ssingaraju@aamva.org)>  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver E

Can you please clarify the Driver E setup step:

- Driver E has all 3 occurrences of Card History populated.

If this is associated with AKA STATE DOCUMENT TYPE and  
AKA STATE DOC REAL-ID CONFORMANT we do not store this information.

**To:** Syeda, Asma <[ASyeda@aamva.org](mailto:ASyeda@aamva.org)>  
**Cc:** Mina Peters, AK Dept. of Administration <[mina.peters@alaska.gov](mailto:mina.peters@alaska.gov)>; Singaraju, Sruti <[ssingaraju@aamva.org](mailto:ssingaraju@aamva.org)>  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver E

Looking through historic AK accident data, it seems the locator reference is not populated if the accident occurred in the AK jurisdiction.

Can you verify this is a required parameter? If so this will require a fix to at least substitute in the record ID.

This email comes from an external source, so remember, Think Before You Click!

Gary,

# E13 sent, responses received:

- On the HB message, DL Issue Date (DDLIS) is missing .
- On the H3 Message there are 3 convictions – S14, S92 and S16.  
S14 has a withdrawal on the H5 Message, this is fine. Since there are 2 Serious convictions (S92 and S16) within 3 years on the H3 message, they should be linked to withdrawal ACD Code 'W30' on the H5 message.

**ACD Manual:**

AAMVA Code Dictionary (ACD) - Release 5.0.0

**Table 18. Withdrawal Disqualification Periods**

Withdrawal Disqualification Periods			
<i>NOTE: disqualification period must be in addition to any other previous period of disqualification (run consecutively)[49 CFR §383.51(a)(5)]</i>

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver E

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

Gary,

Once Mina is back, can you please check with her and see why AK doesn't populate the Accident Locator on the H4 Message?

Can we move on to # E14?

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver E

Looking through historic AK accident data, it seems the locator reference is not populated if the accident occurred in the AK jurisdiction.

Can you verify this is a required parameter? If so this will require a fix to at least substitute in the record ID.

This email comes from an external source, so remember, Think Before You Click!

Gary,

HB, H3, H5, H7 looks fine.

On the H4 message, Accident Locator Reference is missing:

ACCIDENT DATE	1	20170710
ACCIDENT JURISDICTION CODE	1	AK
ACCIDENT LOCATOR REFERENCE	1	
ACCIDENT SEVERITY CODE	1	5
DRIVER ACCIDENT COMMERCIAL VEH IND	1	1
DRIVER ACCIDENT HAZMAT IND	1	2

### SPEXS Master Specs:

#### CDL1.3.5 Transmission of Driver History Accidents (H4) Message:

If sent, the Driver History Accidents (H4) Message must include 1 to 50 accidents. For each accident sent, the following data elements must be sent:

ID	Clear Name and Identifier	Implementation Name	Population Rules	Cardinality (min - max) SOR Implementation		
				CDLIS		
				4.1	5.1	5.3
CDL1.TRN.H4.1000	Accident Jurisdiction Code (DACJUR)	Format=Alpha-numeric Size=2 CLMF-CODE-ACC-JUR	Set to the appropriate jurisdiction code in which the accident occurred	1-50	1-50	1-50
CDL1.TRN.H4.1100	Accident Date (DACDAT)	Format=ccymmdd Size=8 CLMF-DATE-ACC	Set to the appropriate date.	1-50	1-50	1-50
CDL1.TRN.H4.1200	Accident Severity Code (DACSEV)	Format=Alpha-numeric Size=1 CLMF-INDC-ACC-SEVERITY	Set to the appropriate code.	1-50	1-50	1-50
CDL1.TRN.H4.1300	Driver Accident Commercial Vehicle Indicator (DDACOM)	CLMF-INDC-ACC-COMM Format=Alpha-numeric Size=1	Set to the appropriate code.	1-50	1-50	1-50
CDL1.TRN.H4.1400	Driver Accident HAZMAT Indicator (DDAHMZ)	CLMF-INDC-ACC-HAZ-MAT Format=Alpha-numeric Size=1	Set to the appropriate code.	1-50	1-50	1-50

CDL1 Process History Request (SOR/Old SOR)

SPEXS Master Specification (AMIE), r6.0.9

AAMVA - Official

ID	Clear Name and Identifier	Implementation Name	Population Rules	Cardinality (min - max) SOR Implementation		
				CDLIS		
				4.1	5.1	5.3
CDL1.TRN.H4.1500	Accident Locator Reference (DACLOC)	Format=Alpha-numeric Size=18 CLMF-INDC-ACC-LOC	Set to the appropriate reference number.	1-50	1-50	1-50

Can you please look.

Thanks,  
Asma

This email comes from an external source, so remember, Think Before You Click!

Gary,

# E13 sent, responses received:

- On the HB message, DL Issue Date (DDLISS) is missing .
- On the H3 Message there are 3 convictions – S14, S92 and S16.  
S14 has a withdrawal on the H5 Message, this is fine. Since there are 2 Serious convictions (S92 and S16) within 3 years on the H3 message, they should be linked to withdrawal ACD Code 'W30' on the H5 message.

**ACD Manual:**

**Table 18. Withdrawal Disqualification Periods**

<b>Withdrawal Disqualification Periods</b>			
<i>NOTE: disqualification period must be in addition to any other previous period of disqualification (run consecutively)[49 CFR §383.51(a)(5)]</i>			
<b>FMCSR</b>	<b>FMCSR Disqualification Period</b>	<b>ACD</b>	<b>ACD Code Description</b>
383.51(b)(9)	Lifetime	A50	First violation of using a motor vehicle in the commission of a felony involving manufacturing, distributing, or dispensing a controlled substance. (ineligible for reinstatement)
383.73(k)(2)	Indefinite; driver must reapply for a CLP or CDL under State procedures applicable to all CLP and CDL applicants	W27	Failure to make an appointment within 30 days of receiving notification that re-testing is necessary [when fraud is suspected]
383.73(k)(2)	Indefinite; driver must reapply for a CLP or CDL under State procedures applicable to all CLP and CDL applicants	W28	Failure to retest or failure of scheduled test(s) [when fraud is suspected]
383.51(c)	60 days for second serious offense w/in 3 yr	W30	Two serious violations within three years

Can you please look.

Thanks  
Asma

Gary,

Yes, the S92 ACD conviction code was sent without the detail, hence in the error "INVALID CONV OFF DETAIL FOR ACD CONV CODE = S92":

CDN1. H3.	Conviction Offense ACD Code (DCVCCA).	CLMF-ACD-CONV-OFF Format=Alpha- numeric Size=3	If Conviction Offense ACD Code (DCVCCA) is 'S92', Conviction Offense Detail -	H3	x	x	x	x	INVALID CONV OFF DETAIL FOR ACD CONV CODE = S92
--------------	---	--	---	----	---	---	---	---	--

CDN1 Apply Common Validations Process

1539

SPEXS Master Specification (AMIE), r6.0.9

AAMVA - Official Use Only

ID	Clear Name and Identifier	Implementation Name	Validation	SOR Implementation Release				Error Text
				CDUS			CDUS +S25	
				4.1	5.1	5.3	6.0	
XCHKM. 600	Conviction Offense Detail - ACD (DCVCDA)	CLMF-ACD-CONV-OFF. DETAIL Format=Alpha- numeric Size=5	ACD (DCVCDA) must have a numeric value in the range '05'-90' in the first two positions and a numeric value in the last three positions that is less than '300' and greater than the numeric value in the first two positions.					

Can you please add the detail when sending the H3 message .

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver E

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

Gary,

Once Mina is back, can you please check with her and see why AK doesn't populate the Accident Locator on the H4 Message?

Can we move on to # E14?

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver E

Looking through historic AK accident data, it seems the locator reference is not populated if the accident occurred in the AK jurisdiction.

Can you verify this is a required parameter? If so this will require a fix to at least substitute in the record ID.

This email comes from an external source, so remember, Think Before You Click!

Gary,

HB, H3, H5, H7 looks fine.

On the H4 message, Accident Locator Reference is missing:

ACCIDENT DATE	1	20170710
ACCIDENT JURISDICTION CODE	1	AK
ACCIDENT LOCATOR REFERENCE	1	
ACCIDENT SEVERITY CODE	1	5
DRIVER ACCIDENT COMMERCIAL VEH IND	1	1
DRIVER ACCIDENT HAZMAT IND	1	2

### SPEXS Master Specs:

#### CDL1.3.5 Transmission of Driver History Accidents (H4) Message:

If sent, the Driver History Accidents (H4) Message must include 1 to 50 accidents. For each accident sent, the following data elements must be sent:

ID	Clear Name and Identifier	Implementation Name	Population Rules	Cardinality (min - max) SOR Implementation		
				CDLIS		
				4.1	5.1	5.3
CDL1.TRN.H4.1000	Accident Jurisdiction Code (DACJUR)	Format=Alpha-numeric Size=2 CLMF-CODE-ACC-JUR	Set to the appropriate jurisdiction code in which the accident occurred	1-50	1-50	1-50
CDL1.TRN.H4.1100	Accident Date (DACDAT)	Format=ccymmdd Size=8 CLMF-DATE-ACC	Set to the appropriate date.	1-50	1-50	1-50
CDL1.TRN.H4.1200	Accident Severity Code (DACSEV)	Format=Alpha-numeric Size=1 CLMF-INDC-ACC-SEVERITY	Set to the appropriate code.	1-50	1-50	1-50
CDL1.TRN.H4.1300	Driver Accident Commercial Vehicle Indicator (DDACOM)	CLMF-INDC-ACC-COMM Format=Alpha-numeric Size=1	Set to the appropriate code.	1-50	1-50	1-50
CDL1.TRN.H4.1400	Driver Accident HAZMAT Indicator (DDAHMZ)	CLMF-INDC-ACC-HAZ-MAT Format=Alpha-numeric Size=1	Set to the appropriate code.	1-50	1-50	1-50

CDL1 Process History Request (SOR/Old SOR)

SPEXS Master Specification (AMIE), r6.0.9

AAMVA - Official

ID	Clear Name and Identifier	Implementation Name	Population Rules	Cardinality (min - max) SOR Implementation		
				CDLIS		
				4.1	5.1	5.3
CDL1.TRN.H4.1500	Accident Locator Reference (DACLOC)	Format=Alpha-numeric Size=18 CLMF-INDC-ACC-LOC	Set to the appropriate reference number.	1-50	1-50	1-50

Can you please look.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver E

This email comes from an external source, so remember, Think Before You Click!

Gary,

# E13 sent, responses received:

- On the HB message, DL Issue Date (DDLIS) is missing .
- On the H3 Message there are 3 convictions – S14, S92 and S16.  
S14 has a withdrawal on the H5 Message, this is fine. Since there are 2 Serious convictions (S92 and S16) within 3 years on the H3 message, they should be linked to withdrawal ACD Code 'W30' on the H5 message.

**ACD Manual:**

**Table 18. Withdrawal Disqualification Periods**

<b>Withdrawal Disqualification Periods</b>			
<i>NOTE: disqualification period must be in addition to any other previous period of disqualification (run consecutively)[49 CFR §383.51(a)(5)]</i>			
<b>FMCSR</b>	<b>FMCSR Disqualification Period</b>	<b>ACD</b>	<b>ACD Code Description</b>
383.51(b)(9)	Lifetime	A50	First violation of using a motor vehicle in the commission of a felony involving manufacturing, distributing, or dispensing a controlled substance. (ineligible for reinstatement)
383.73(k)(2)	Indefinite; driver must reapply for a CLP or CDL under State procedures applicable to all CLP and CDL applicants	W27	Failure to make an appointment within 30 days of receiving notification that re-testing is necessary [when fraud is suspected]
383.73(k)(2)	Indefinite; driver must reapply for a CLP or CDL under State procedures applicable to all CLP and CDL applicants	W28	Failure to retest or failure of scheduled test(s) [when fraud is suspected]
383.51(c)	60 days for second serious offense w/in 3 yr	W30	Two serious violations within three years

Can you please look.

Thanks  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver E

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

This email comes from an external source, so remember, Think Before You Click!

Sure Gary,

You can add the pointer without Card History since you don't store the AKA State Doc Type and AKA Real ID.

Thanks,  
Asma

**Subject:** Rollout of new NMVTIS Brand - Hazardous Substance Contaminated Vehicle

**NMVTIS Participants:**

AAMVA will make available a new Brand in NMVTIS called "Hazardous Substance Contaminated Vehicle" to the jurisdictions on August 1, 2017.

Below are the details of the new Brand:

Brand Code: 55

Brand Description:

Hazardous Substance Contaminated Vehicle - The jurisdiction has determined that the vehicle has been contaminated by a 'hazardous substance' and is unsafe for use. Excluding flood damaged vehicles.

A 'hazardous substance' is any substance that could diminish the safety of the vehicle or cause injury to its occupants. The 'hazardous substance' has one or more, but is not limited to the following intrinsic 'hazardous properties':

- Explosiveness
- Flammability
- Ability to oxidize (accelerate a fire)
- Human toxicity (acute or chronic)
- Corrosiveness (to human tissue or metal)
- Eco toxicity (with or without bioaccumulation)
- Capacity, on contact with air or water, to develop one or more of the above properties.

The AAMVA team remains dedicated to providing quality services that meet the critical business needs of our customers, including providing advance notice of all planned outages. If you have any questions or concerns, please contact the AAMVA Operations Department at 1-888-AAMVA80 option 1 or [helpdesk@aamva.org](mailto:helpdesk@aamva.org).

This email comes from an external source, so remember, Think Before You Click!  
Gary,

Once Mina is back, can you please check with her and see why AK doesn't populate the Accident Locator on the H4 Message?

Can we move on to # E14?

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver E

Looking through historic AK accident data, it seems the locator reference is not populated if the accident occurred in the AK jurisdiction.

Can you verify this is a required parameter? If so this will require a fix to at least substitute in the record ID.

This email comes from an external source, so remember, Think Before You Click!

Gary,

HB, H3, H5, H7 looks fine.

On the H4 message, Accident Locator Reference is missing:

ACCIDENT DATE	1	20170710
ACCIDENT JURISDICTION CODE	1	AK
ACCIDENT LOCATOR REFERENCE	1	
ACCIDENT SEVERITY CODE	1	5
DRIVER ACCIDENT COMMERCIAL VEH INI	1	1
DRIVER ACCIDENT HAZMAT IND	1	2

#### **SPEXS Master Specs:**

CDL1.3.5 Transmission of Driver History Accidents (H4) Message:

If sent, the Driver History Accidents (H4) Message must include 1 to 50 accidents. For each accident sent, the following data elements must be sent:

ID	Clear Name and Identifier	Implementation Name	Population Rules	Cardinality (min - max) SOR Implementation		
				CDLIS		
				4.1	5.1	5.3
CDL1.TRN.H4.1000	Accident Jurisdiction Code (DACJUR)	Format=Alpha-numeric Size=2 CLMF-CODE-ACC-JUR	Set to the appropriate jurisdiction code in which the accident occurred	1-50	1-50	1-50
CDL1.TRN.H4.1100	Accident Date (DACDAT)	Format=ccyyymmdd Size=8 CLMF-DATE-ACC	Set to the appropriate date.	1-50	1-50	1-50
CDL1.TRN.H4.1200	Accident Severity Code (DACSEV)	Format=Alpha-numeric Size=1 CLMF-INDC-ACC-SEVERITY	Set to the appropriate code.	1-50	1-50	1-50
CDL1.TRN.H4.1300	Driver Accident Commercial Vehicle Indicator (DDACOM)	CLMF-INDC-ACC-COMM Format=Alpha-numeric Size=1	Set to the appropriate code.	1-50	1-50	1-50

This email comes from an external source, so remember, Think Before You Click!

Gary,

# E13 sent, responses received:

- On the HB message, DL Issue Date (DDLIS) is missing .
- On the H3 Message there are 3 convictions – S14, S92 and S16.  
S14 has a withdrawal on the H5 Message, this is fine. Since there are 2 Serious convictions (S92 and S16) within 3 years on the H3 message, they should be linked to withdrawal ACD Code 'W30' on the H5 message.

#### ACD Manual:

AAMVA Code Dictionary (ACD) - Release 5.0.0

**Table 18. Withdrawal Disqualification Periods**

Withdrawal Disqualification Periods			
<i>NOTE: disqualification period must be in addition to any other previous period of disqualification (run consecutively)[49 CFR §383.51(a)(5)]</i>			
FMCSR	FMCSR Disqualification Period	ACD	ACD Code Description
383.51(b)(9)	Lifetime	A50	First violation of using a motor vehicle in the commission of a felony involving manufacturing, distributing, or dispensing a controlled substance. (ineligible for reinstatement)
383.73(k)(2)	Indefinite; driver must reapply for a CLP or CDL under State procedures applicable to all CLP and CDL applicants	W27	Failure to make an appointment within 30 days of receiving notification that re-testing is necessary [when fraud is suspected]
383.73(k)(2)	Indefinite; driver must reapply for a CLP or CDL under State procedures applicable to all CLP and CDL applicants	W28	Failure to retest or failure of scheduled test(s) [when fraud is suspected]
383.51(c)	60 days for second serious offense w/in 3 yr	W30	Two serious violations within three years

Can you please look.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver E

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

This email comes from an external source, so remember, Think Before You Click!

Sure Gary,

You can add the pointer without Card History since you don't store the AKA State Doc Type and AKA Real ID.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver E

Can you please clarify the Driver E setup step:

- Driver E has all 3 occurrences of Card History populated.

If this is associated with AKA STATE DOCUMENT TYPE and  
AKA STATE DOC REAL-ID CONFORMANT we do not store this information.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Gary,

If AI cannot add a pointer with a Pseudo SSN, you can add Driver G with Assigned SSN.

Let me know if you have any question.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Ok, thanks.

I likely will be unable to test for the next hour or two while we deal with unrelated pressing issues.

If I am able to get a quick fix in for any of the new bugs today we may be able to continue testing; otherwise we likely will need to start again tomorrow. I'll let you know the situation in the next hour or so.

This email comes from an external source, so remember, Think Before You Click!

Gary,

If AI cannot add a pointer with a Pseudo SSN, you can add Driver G with Assigned SSN.

Let me know if you have any question.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Ok, thanks.

I likely will be unable to test for the next hour or two while we deal with unrelated pressing issues.

If I am able to get a quick fix in for any of the new bugs today we may be able to continue testing; otherwise we likely will need to start again tomorrow. I'll let you know the situation in the next hour or so.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** Reminder: Minnesota Going Live as a Fully Integrated Online State via NMVTIS Web Services  
**Attachments:** UNI Setup for Site ID\_20170714113952.docx

NMVTIS Participants:

Please consider this as a reminder that Minnesota is confirmed to implement as a Fully Integrated Online state via NMVTIS Web Services on Sunday, July 23<sup>rd</sup>, 2017. Minnesota is currently participating in NMVTIS as a batch state. You will need to update your UNI Site Table and ensure **MN** is set up for application id '**22**' with a jurisdiction subsystem code of '**1**'. UNI will need to be restarted after you have made this change. Please refer to the attached document for instructions on how to make changes to the UNI site table. Please let us know if you have any questions.

States participating in batch mode and responding to unsolicited messages would need to update their UNI Site Table and ensure **MN** is setup for application id '**22**' with a jurisdiction subsystem code of '**1**'. States participating in batch mode and not responding to unsolicited messages do not need to make any UNI changes.

**Note: Please ensure that the above mentioned configuration update to your UNI is completed no later than July 22<sup>nd</sup>, 2017.**

If you have any questions, please contact the AAMVA Operations Department at 1888-226-8280 option 1 or [Helpdesk@aamva.org](mailto:Helpdesk@aamva.org).

## Set up a subscriber in UNI site table

1. Go to Edit/Subscriber/Site Table
2. Check if the site is already in the site table by entering site ID in the field Site Name on the first line. In the screen print below we are using AA.

Edit		View	Tools	Admin	Help		
Action		+	Delete	Site Name	Site Net Name	X Ref	
				aa			
	<a href="#">Edit</a>		<a href="#">Delete</a>	AA	AAMVAnet	000	
	<a href="#">Edit</a>		<a href="#">Delete</a>	AA1	AA Bridge	000	

3. If it doesn't show up, then you will need to add it by clicking on the plus sign on that screen.

Edit		View	Tools	Admin	Help
Action	+	Delete	Site Name	Site Net Name	X Ref
			aa		
<a href="#">Edit</a>		<a href="#">Delete</a>	AA	AAMVAnet	000
 <a href="#">Edit</a>		<a href="#">Delete</a>	AA1	AA Bridge	000

4. That will give you a line that you can enter the data in

Edit		View	Tools	Admin	Help
Action		Delete	Site Name	Site Net Name	X Ref
<a href="#">Update</a> <a href="#">Cancel</a>			aa		
<input checked="" type="checkbox"/>	<a href="#">Edit</a>	<a href="#">Delete</a>	AA	AAMVAnet	000
<input checked="" type="checkbox"/>	<a href="#">Edit</a>	<a href="#">Delete</a>	AA1	AA Bridge	000

5. Enter site ID, site net name (14 characters max), put 000 in the xref number, and then click update.
6. The name entry is now entered in the database, now you need to setup the application and role that the site will be using. Expand the new site.
7. You will see the applications (if there are any) that have been selected. If you are using CIDLIS change the subsystem code for 02-CIDLIS to 8-STATES.

<a href="#">Edit</a>	<a href="#">Delete</a>	AA	AAMVAnet	000

<a href="#">Edit</a>	22 - NMVTIS R2	1 - JURISDICT		
<a href="#">Edit</a>	23 - PPI	3 - S-P BRIDGE		
<a href="#">Edit</a>	24 - EVVER	2 - NAPHSIS		
<a href="#">Edit</a>	25 - AID	2 - BS PARTNER		
<a href="#">Edit</a>	26 - ENS	1 - JURISDICT		
<a href="#">Edit</a>	27 - VIN PING	1 - SRV PRVDR		
<a href="#">Edit</a>	28 - VLS	2 - USCIS		
<a href="#">Edit</a>	29 - CNSMR ACCS	1 - SRV PRVDR		
<a href="#">Edit</a>	30 - RIDE			
<a href="#">Edit</a>	31 - AXLE			
<a href="#">Edit</a>	32 - PASSPORT	1 - STATE		
<a href="#">Edit</a>	33 - VLS 20			

8. Select the role for the application that this site needs to be setup for. Also make sure that NCS is checked for the Network Service Code. If you have made a change, be sure to click update.
9. The data is now saved to the database, but in order for the change to take place for a UNI that is currently running, go to tools/Utilities/Configuration Update/Windows Services. A pop up screen will show the update status that have been applied to the services.

**Subject:** AK - AMIE Online Re-write Meeting  
**Location:** Conference Room Jaguar 4  
  
**Start:** Wed 7/19/2017 12:30 PM  
**End:** Wed 7/19/2017 1:30 PM  
**Show Time As:** Tentative  
  
**Recurrence:** (none)  
  
**Organizer:** Creighton, Susan

**Conference Call Number: (888) 390-7016**  
**PIN: 1509728**

AK Meeting  
Agenda 2017071...

## MEETING AGENDA and MINUTES ALASKA – STATUS MEETING

**Date of Meeting:** 7/19/2017

**Minutes Prepared By:** Susan Creighton

**Location:** Conference Call – (888) 390-7016 pass code 1509728  
Jaguar Conference Room Time: 4:30 PM – 5:30 PM ET

### 1. Purpose of Meeting *(prepare and distribute in advance of meeting)*

Discuss status of NMVTIS implementation re-write for AMIE integrated online updates and inquiries with initial load. Tentative implementation is set for early December 2017.

### 2. Attendance at Meeting *(add rows as necessary)*

Name	Department/Division	Invitee	Attended
Mina Peters	Alaska	√	
David Nolen	Alaska	√	
Dillon Pressley	Alaska – Resource Data	√	
Patrick Anderson	Alaska – Resource Data	√	
Patrick Brosnan	Alaska – Business	√	
Debra Leonardo	Alaska – Business	√	
Katie Smith	Alaska – Business	√	
Casey Garber	AAMVA, Business Solutions	√	
Marney Michalowski	AAMVA, Business Solutions	√	
Susan Creighton	AAMVA, Lead Systems Analyst	√	
Amir Chaudhry	AAMVA, Lead Systems Analyst	√	

### 3. Meeting Agenda *(prepare and distribute in advance of meeting)*

- Online Scenario Testing
- Next Steps
- Questions & Concerns

### 4. Meeting Notes, Decisions, Issues

---

---

---

---

---

---

---

---

---

### 5. Action Items *(add rows as necessary)*

Action	Assigned to	Due Date	Status

### 6. Issues Identified *(add rows as necessary; issues are unplanned items of impact that require action)*

Issues	Owner	Due Date	Status

### 7. Next Meeting

Date: (MM/DD/CCYY)	7/26/2017	Time:	4:30 pm – 5:30 pm ET	Location:	Jaguar Conference Room
Agenda:	Will be Sent out Prior to Meeting

Marney Michalowski	AAMVA, Business Solutions	√	
Susan Creighton	AAMVA, Lead Systems Analyst	√	√
Amir Chaudhry	AAMVA, Lead Systems Analyst	√	

### 3. Meeting Agenda *(prepare and distribute in advance of meeting)*

- Online Scenario Testing
- Next Steps
- Questions & Concerns

### 4. Meeting Notes, Decisions, Issues

Online Scenario testing continues. 83 total online scenario testing cases:

This week: 47 Test Cases have passed, 5 Test Cases are in failed status, none are with AAMVA to be validated and 31 have not been executed.

Last week: 45 Test Cases had passed, 6 Test Cases were in failed status, none were with AAMVA to be validated and 32 had not been executed.

AK is working on an issue which should be resolved soon. AK plans to be ready no later than Monday to start testing again.

AK will be migrating their data to a new database but they plan to bring everything over. They will maintain data on both databases in parallel for some time to ensure no issues. If AK decides they will not bring all data over they will let AAMVA know so that we can set up a process to mark those records purged on NMVTIS. If there are current titles on NMVTIS that are not marked purged but are no longer on the AK database, when another state performs a CSOT an unsolicited message will be sent to AK and that would become suspended. Those suspensions would then need to be worked by the AK helpdesk.

#### NEXT STEPS:

Continue Online Scenario Testing

### 5. Action Items *(add rows as necessary)*

Action	Assigned to	Due Date	Status

### 6. Issues Identified *(add rows as necessary; issues are unplanned items of impact that require action)*

Issues	Owner	Due Date	Status

### 7. Next Meeting

Date: (MM/DD/CCYY)	7/26/2017	Time:	4:30 pm – 5:30 pm ET	Location:	Jaguar Conference Room

### U.S. House Subcommittee Moves Autonomous Vehicles Legislation

The United States House of Representatives Digital Commerce and Consumer Protection Subcommittee held a [hearing](#) on their draft autonomous vehicles legislation. Subcommittee Chairman Robert Latta (R-OH) offered a bipartisan [amendment](#) in the nature of a substitute that replaced previous versions of the legislation being considered by the Subcommittee.

Of particular interest to AAMVA is Section 2 – NHTSA Authority and State Preemption for Autonomous Motor Vehicles – which seeks to preempt state authority to regulate autonomous vehicles, stating that "No state or political subdivision State may adopt, maintain, enforce, impose, or continue in effect any law, rule, regulation, duty, requirement, standard, or other provision having the force and effect of law related to the design, construction, mechanical systems, hardware and software systems, or communications systems of highly automated vehicles or automated driving system equipment unless such law, rule, regulation, duty, requirement, standard, or other provision having the force and effect of law is identical to a standard prescribed under this chapter." This language precludes a state from regulating the vehicle safety components of a motor vehicle. At issue is how this language affects regulation of the operational driving task, and whether states are precluded from regulating the operational safety of the vehicles in general.

Subsequent Section 3 intends to preserve state authority, but may actually confuse rather than clarify a state's role. It states, "(3) Rule of Construction – Nothing in this subsection may be construed to prohibit a State from prescribing a law or regulation regarding any registration, licensing, liability, driving education and training, insurance, safety inspections, or traffic law or regulation unless the law or regulation is an unreasonable restriction on the design, construction, mechanical systems, hardware and software systems, or communications systems of highly automated vehicles." This language could be considered at odds with the preemptive language as to what constitutes "an unreasonable restriction on the design, construction, mechanical systems, hardware and software systems" given that these components of the vehicle will be responsible for navigating the entire dynamic driving task.

AAMVA has advised the Committee on the need to separate and clarify the vehicle design safety process attributed to the federal government from the operational safety oversight needs of states. AAMVA has been working

collaboratively with key stakeholders, including with the National Governors Association (NGA), the National Conference of State Legislatures (NCSL), the Governors Highway Safety Association (GHSA) and the American Association State Highway Transportation Officials (AASHTO) to make these similar concerns known to the Committee.

Committee members indicated that these sections are still under bipartisan review. With assurances that the Committee will proceed in negotiations in a bipartisan manner, the Subcommittee passed the language by voice vote. While minority members expressed the need to proceed carefully in developing the full bill, the Subcommittee Chairman indicated that the full Energy and Commerce Committee could mark up the legislation as early as next week.

Of particular interest to AAMVA is Section 2 – NHTSA Authority and State Preemption for Autonomous Motor Vehicles – which seeks to preempt state authority to regulate autonomous vehicles, stating that "No state or political subdivision State may adopt, maintain, enforce, impose, or continue in effect any law, rule, regulation, duty, requirement, standard, or other provision having the force and effect of law related to the design, construction, mechanical systems, hardware and software systems, or communications systems of highly automated vehicles or automated driving system equipment unless such law, rule, regulation, duty, requirement, standard, or other provision having the force and effect of law is identical to a standard prescribed under this chapter." This language precludes a state from regulating the vehicle safety components of a motor vehicle. At issue is how this language affects regulation of the operational driving task, and whether states are precluded from regulating the operational safety of the vehicles in general.

Subsequent Section 3 intends to preserve state authority, but may actually confuse rather than clarify a state's role. It states, "(3) Rule of Construction – Nothing in this subsection may be construed to prohibit a State from prescribing a law or regulation regarding any registration, licensing, liability, driving education and training, insurance, safety inspections, or traffic law or regulation unless the law or regulation is an unreasonable restriction on the design, construction, mechanical systems, hardware and software systems, or communications systems of highly automated vehicles." This language could be considered at odds with the preemptive language as to what constitutes "an unreasonable restriction on the design, construction, mechanical systems, hardware and software systems" given that these components of the vehicle will be responsible for navigating the entire dynamic driving task.

AAMVA has advised the Committee on the need to separate and clarify the vehicle design safety process attributed to the federal government from the operational safety oversight needs of states. AAMVA has been working

collaboratively with key stakeholders, including with the National Governors Association (NGA), the National Conference of State Legislatures (NCSL), the Governors Highway Safety Association (GHSA) and the American Association State Highway Transportation Officials (AASHTO) to make these similar concerns known to the Committee.

Committee members indicated that these sections are still under bipartisan review. With assurances that the Committee will proceed in negotiations in a bipartisan manner, the Subcommittee passed the language by voice vote. While minority members expressed the need to proceed carefully in developing the full bill, the Subcommittee Chairman indicated that the full Energy and Commerce Committee could mark up the legislation as early as next week.

The United States House of Representatives Digital Commerce and Consumer Protection Subcommittee held a [hearing](#) on their draft autonomous vehicles legislation. Subcommittee Chairman Robert Latta (R-OH) offered a bipartisan [amendment](#) in the nature of a substitute that replaced previous versions of the legislation being considered by the Subcommittee.

Of particular interest to AAMVA is Section 2 – NHTSA Authority and State Preemption for Autonomous Motor Vehicles – which seeks to preempt state authority to regulate autonomous vehicles, stating that "No state or political subdivision State may adopt, maintain, enforce, impose, or continue in effect any law, rule, regulation, duty, requirement, standard, or other provision having the force and effect of law related to the design, construction, mechanical systems, hardware and software systems, or communications systems of highly automated vehicles or automated driving system equipment unless such law, rule, regulation, duty, requirement, standard, or other provision having the force and effect of law is identical to a standard prescribed under this chapter." This language precludes a state from regulating the vehicle safety components of a motor vehicle. At issue is how this language affects regulation of the operational driving task, and whether states are precluded from regulating the operational safety of the vehicles in general.

Subsequent Section 3 intends to preserve state authority, but may actually confuse rather than clarify a state's role. It states, "(3) Rule of Construction – Nothing in this subsection may be construed to prohibit a State from prescribing a law or regulation regarding any registration, licensing, liability, driving education and training, insurance, safety inspections, or traffic law or regulation unless the law or regulation is an unreasonable restriction on the design, construction, mechanical systems, hardware and software systems, or communications systems of highly automated vehicles." This language could be considered at odds with the preemptive language as to what constitutes "an unreasonable restriction on the design, construction, mechanical systems, hardware and software systems" given that these components of the vehicle will be responsible for navigating the entire dynamic driving task.

AAMVA has advised the Committee on the need to separate and clarify the vehicle design safety process attributed to the federal government from the operational safety oversight needs of states. AAMVA has been working

collaboratively with key stakeholders, including with the National Governors Association (NGA), the National Conference of State Legislatures (NCSL), the Governors Highway Safety Association (GHSA) and the American Association State Highway Transportation Officials (AASHTO) to make these similar concerns known to the Committee.

Committee members indicated that these sections are still under bipartisan review. With assurances that the Committee will proceed in negotiations in a bipartisan manner, the Subcommittee passed the language by voice vote. While minority members expressed the need to proceed carefully in developing the full bill, the Subcommittee Chairman indicated that the full Energy and Commerce Committee could mark up the legislation as early as next week.

### U.S. House Subcommittee Moves Autonomous Vehicles Legislation

The United States House of Representatives Digital Commerce and Consumer Protection Subcommittee held a [hearing](#) on their draft autonomous vehicles legislation. Subcommittee Chairman Robert Latta (R-OH) offered a bipartisan [amendment](#) in the nature of a substitute that replaced previous versions of the legislation being considered by the Subcommittee.

Of particular interest to AAMVA is Section 2 – NHTSA Authority and State Preemption for Autonomous Motor Vehicles – which seeks to preempt state authority to regulate autonomous vehicles, stating that "No state or political subdivision State may adopt, maintain, enforce, impose, or continue in effect any law, rule, regulation, duty, requirement, standard, or other provision having the force and effect of law related to the design, construction, mechanical systems, hardware and software systems, or communications systems of highly automated vehicles or automated driving system equipment unless such law, rule, regulation, duty, requirement, standard, or other provision having the force and effect of law is identical to a standard prescribed under this chapter." This language precludes a state from regulating the vehicle safety components of a motor vehicle. At issue is how this language affects regulation of the operational driving task, and whether states are precluded from regulating the operational safety of the vehicles in general.

Subsequent Section 3 intends to preserve state authority, but may actually confuse rather than clarify a state's role. It states, "(3) Rule of Construction – Nothing in this subsection may be construed to prohibit a State from prescribing a law or regulation regarding any registration, licensing, liability, driving education and training, insurance, safety inspections, or traffic law or regulation unless the law or regulation is an unreasonable restriction on the design, construction, mechanical systems, hardware and software systems, or communications systems of highly automated vehicles." This language could be considered at odds with the preemptive language as to what constitutes "an unreasonable restriction on the design, construction, mechanical systems, hardware and software systems" given that these components of the vehicle will be responsible for navigating the entire dynamic driving task.

AAMVA has advised the Committee on the need to separate and clarify the vehicle design safety process attributed to the federal government from the operational safety oversight needs of states. AAMVA has been working

### U.S. House Subcommittee Moves Autonomous Vehicles Legislation

The United States House of Representatives Digital Commerce and Consumer Protection Subcommittee held a [hearing](#) on their draft autonomous vehicles legislation. Subcommittee Chairman Robert Latta (R-OH) offered a bipartisan [amendment](#) in the nature of a substitute that replaced previous versions of the legislation being considered by the Subcommittee.

Of particular interest to AAMVA is Section 2 – NHTSA Authority and State Preemption for Autonomous Motor Vehicles – which seeks to preempt state authority to regulate autonomous vehicles, stating that "No state or political subdivision State may adopt, maintain, enforce, impose, or continue in effect any law, rule, regulation, duty, requirement, standard, or other provision having the force and effect of law related to the design, construction, mechanical systems, hardware and software systems, or communications systems of highly automated vehicles or automated driving system equipment unless such law, rule, regulation, duty, requirement, standard, or other provision having the force and effect of law is identical to a standard prescribed under this chapter." This language precludes a state from regulating the vehicle safety components of a motor vehicle. At issue is how this language affects regulation of the operational driving task, and whether states are precluded from regulating the operational safety of the vehicles in general.

Subsequent Section 3 intends to preserve state authority, but may actually confuse rather than clarify a state's role. It states, "(3) Rule of Construction – Nothing in this subsection may be construed to prohibit a State from prescribing a law or regulation regarding any registration, licensing, liability, driving education and training, insurance, safety inspections, or traffic law or regulation unless the law or regulation is an unreasonable restriction on the design, construction, mechanical systems, hardware and software systems, or communications systems of highly automated vehicles." This language could be considered at odds with the preemptive language as to what constitutes "an unreasonable restriction on the design, construction, mechanical systems, hardware and software systems" given that these components of the vehicle will be responsible for navigating the entire dynamic driving task.

AAMVA has advised the Committee on the need to separate and clarify the vehicle design safety process attributed to the federal government from the operational safety oversight needs of states. AAMVA has been working

collaboratively with key stakeholders, including with the National Governors Association (NGA), the National Conference of State Legislatures (NCSL), the Governors Highway Safety Association (GHSA) and the American Association State Highway Transportation Officials (AASHTO) to make these similar concerns known to the Committee.

Committee members indicated that these sections are still under bipartisan review. With assurances that the Committee will proceed in negotiations in a bipartisan manner, the Subcommittee passed the language by voice vote. While minority members expressed the need to proceed carefully in developing the full bill, the Subcommittee Chairman indicated that the full Energy and Commerce Committee could mark up the legislation as early as next week.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPESS2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESSD) should be populated with a blank SSN (DDVSS6), correct?

**Cc:** Mina Peters, AK Dept. of Administration <[mina.peters@alaska.gov](mailto:mina.peters@alaska.gov)>; Singaraju, Sruti <[ssingaraju@aamva.org](mailto:ssingaraju@aamva.org)>  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Gary,

If AI cannot add a pointer with a Pseudo SSN, you can add Driver G with Assigned SSN.

Let me Know if you have any question.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

Ok, thanks.

I likely will be unable to test for the next hour or two while we deal with unrelated pressing issues.

If I am able to get a quick fix in for any of the new bugs today we may be able to continue testing; otherwise we likely will need to start again tomorrow. I'll let you know the situation in the next hour or so.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

Gary,

If AI cannot add a pointer with a Pseudo SSN, you can add Driver G with Assigned SSN.

Let me Know if you have any question.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPSS2). But since the new pointer is non-CDLIS, only the last 5 digits (BPSSD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Ok, thanks.

I likely will be unable to test for the next hour or two while we deal with unrelated pressing issues.

If I am able to get a quick fix in for any of the new bugs today we may be able to continue testing; otherwise we likely will need to start again tomorrow. I'll let you know the situation in the next hour or so.

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPSS2). But since the new pointer is non-CDLIS, only the last 5 digits (BPSSD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Gary,

To avoid any confusion, I think you can use the values same as that were present on the NA that AI received.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

In the F4 instructions it depicts both the pointer SSN and duplicate SSN as 111999999:

- Driver Social Security Number (DDVSS6) = 111999999
- Duplicate Driver Social Security Number (DDVSS8) = 111999999

Can I assume the DDVSS6 should still be the substitute SSN?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

I got an returned error SSN AND SSN TYPE MUST BE CONSISTENT.

Maybe I misunderstood the test instruction. It depicted SSN 111999999, however, I gather I should not have changed the SSN and instead only changed the name fields. Is that correct?

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

Gary,

Sure. If you are ready today, just let me know and we can continue.

Thursday and Friday, I am out of office.

Thursday, Siri can help you till 1:30 PM (EST) and Friday you can continue with her till 3:30 PM (EST).

Let me know if you have any questions.

Thanks,  
Asma

Ok, thanks.

I likely will be unable to test for the next hour or two while we deal with unrelated pressing issues.

If I am able to get a quick fix in for any of the new bugs today we may be able to continue testing; otherwise we likely will need to start again tomorrow. I'll let you know the situation in the next hour or so.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPSS2). But since the new pointer is non-CDLIS, only the last 5 digits (BPSSD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPSS2). But since the new pointer is non-CDLIS, only the last 5 digits (BPSSD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Gary,

If AI cannot add a pointer with a Pseudo SSN, you can add Driver G with Assigned SSN.

Let me know if you have any question.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Cc:** Mina Peters, AK Dept. of Administration <[mina.peters@alaska.gov](mailto:mina.peters@alaska.gov)>; Singaraju, Sruti <[ssingaraju@aamva.org](mailto:ssingaraju@aamva.org)>

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPSS2). But since the new pointer is non-CDLIS, only the last 5 digits (BPSSD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

In the F4 instructions it depicts both the pointer SSN and duplicate SSN as 111999999:

- Driver Social Security Number (DDVSS6) = 111999999
- Duplicate Driver Social Security Number (DDVSS8) = 111999999

Can I assume the DDVSS6 should still be the substitute SSN?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Gary,

To avoid any confusion, I think you can use the values same as that were present on the NA that AI received.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

In the F4 instructions it depicts both the pointer SSN and duplicate SSN as 111999999:

- Driver Social Security Number (DDVSS6) = 111999999
- Duplicate Driver Social Security Number (DDVSS8) = 111999999

Can I assume the DDVSS6 should still be the substitute SSN?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPSS2). But since the new pointer is non-CDLIS, only the last 5 digits (BPSSD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

Ok, thanks.

I likely will be unable to test for the next hour or two while we deal with unrelated pressing issues.

If I am able to get a quick fix in for any of the new bugs today we may be able to continue testing; otherwise we likely will need to start again tomorrow. I'll let you know the situation in the next hour or so.

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

Gary,

Sure. If you are ready today, just let me know and we can continue.

Thursday and Friday, I am out of office.

Thursday, Siri can help you till 1:30 PM (EST) and Friday you can continue with her till 3:30 PM (EST).

Let me know if you have any questions.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPES5) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

Gary,

Sure. If you are ready today, just let me know and we can continue.

Thursday and Friday, I am out of office.

Thursday, Siri can help you till 1:30 PM (EST) and Friday you can continue with her till 3:30 PM (EST).

Let me know if you have any questions.

Thanks,  
Asma

Ok, thanks.

I likely will be unable to test for the next hour or two while we deal with unrelated pressing issues.

If I am able to get a quick fix in for any of the new bugs today we may be able to continue testing; otherwise we likely will need to start again tomorrow. I'll let you know the situation in the next hour or so.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPESS2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESSD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

Gary,

Sure. If you are ready today, just let me know and we can continue.

Thursday and Friday, I am out of office.

Thursday, Siri can help you till 1:30 PM (EST) and Friday you can continue with her till 3:30 PM (EST).

Let me know if you have any questions.

Thanks,  
Asma

Ok, thanks.

I likely will be unable to test for the next hour or two while we deal with unrelated pressing issues.

If I am able to get a quick fix in for any of the new bugs today we may be able to continue testing; otherwise we likely will need to start again tomorrow. I'll let you know the situation in the next hour or so.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

Gary,

Sure. If you are ready today, just let me know and we can continue.

Thursday and Friday, I am out of office.

Thursday, Siri can help you till 1:30 PM (EST) and Friday you can continue with her till 3:30 PM (EST).

Let me know if you have any questions.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

I got an returned error SSN AND SSN TYPE MUST BE CONSISTENT.

Maybe I misunderstood the test instruction. It depicted SSN 111999999, however, I gather I should not have changed the SSN and instead only changed the name fields. Is that correct?

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPSS2). But since the new pointer is non-CDLIS, only the last 5 digits (BPSSD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

In the F4 instructions it depicts both the pointer SSN and duplicate SSN as 111999999:

- Driver Social Security Number (DDVSS6) = 111999999
- Duplicate Driver Social Security Number (DDVSS8) = 111999999

Can I assume the DDVSS6 should still be the substitute SSN?

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPESS2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESSD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

In the F4 instructions it depicts both the pointer SSN and duplicate SSN as 111999999:

- Driver Social Security Number (DDVSS6) = 111999999
- Duplicate Driver Social Security Number (DDVSS8) = 111999999

Can I assume the DDVSS6 should still be the substitute SSN?

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPSS2). But since the new pointer is non-CDLIS, only the last 5 digits (BPSSD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Sure Gary, NP.

Can we start Driver G while you are fixing Driver F?

Please let me know.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Please help me understand the scenario. Since the P3 driver has a non-CDL permit, yet the CSOR is for a CDLIS = Y, is the expectation that AI is creating a CDL for the driver or a permit?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

If AI cannot add a pointer with a Pseudo SSN, you can add Driver G with Assigned SSN.

Let me Know if you have any question.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

Sure. If you are ready today, just let me know and we can continue.

Thursday and Friday, I am out of office.

Thursday, Siri can help you till 1:30 PM (EST) and Friday you can continue with her till 3:30 PM (EST).

Let me know if you have any questions.

Thanks,  
Asma

Ok, thanks.

I likely will be unable to test for the next hour or two while we deal with unrelated pressing issues.

If I am able to get a quick fix in for any of the new bugs today we may be able to continue testing; otherwise we likely will need to start again tomorrow. I'll let you know the situation in the next hour or so.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

I got an returned error SSN AND SSN TYPE MUST BE CONSISTENT.

Maybe I misunderstood the test instruction. It depicted SSN 111999999, however, I gather I should not have changed the SSN and instead only changed the name fields. Is that correct?

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Ok, F5 looked good but for F6, I received 'ERROR PROCESSING REQUEST' instead of 'REQUESTED RECORD NOT FOUND – ADDL INFO MISMATCH (#1)'.

Could you please take a look?

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

In the F4 instructions it depicts both the pointer SSN and duplicate SSN as 111999999:

- Driver Social Security Number (DDVSS6) = 111999999
- Duplicate Driver Social Security Number (DDVSS8) = 111999999

Can I assume the DDVSS6 should still be the substitute SSN?

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

This email comes from an external source, so remember, Think Before You Click!

Sure Gary, NP.

Can we start Driver G while you are fixing Driver F?

Please let me know.

Thanks,  
Asma

**Sent:** Thursday, July 20, 2017 3:23 PM  
**To:** Holenarsipura, Subramanya; Syeda, Asma  
**Cc:** Peters, Mina L (DOA); Singaraju, Sruti  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Hi Siri

I am going to need some direction on validation rules associated with the error REQUESTED RECORD NOT FOUND – ADDL INFO MISMATCH (#1).

Section *CD03.3.2.5 Retrieved Records Validation* has no definition for the rule other than “See step 3 above”, of which I cannot find.

Also what is the distinction between error (#1) versus (#2). Per the test script, I see these errors can occur for SB and SG although it just seems to be documented for SG. Can you clarify the scope of the usage? Since these requests do not require most of the pointer parameters is it such that only provided parameters are included in the validation?

Thanks  
Gary

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Please help me understand the scenario. Since the P3 driver has a non-CDL permit, yet the CSOR is for a CDLIS = Y, is the expectation that AI is creating a CDL for the driver or a permit?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

This email comes from an external source, so remember, Think Before You Click!

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Hi Siri

I am going to need some direction on validation rules associated with the error REQUESTED RECORD NOT FOUND – ADDL INFO MISMATCH (#1).

Section *CD03.3.2.5 Retrieved Records Validation* has no definition for the rule other than “See step 3 above”, of which I cannot find.

Also what is the distinction between error (#1) versus (#2). Per the test script, I see these errors can occur for SB and SG although it just seems to be documented for SG. Can you clarify the scope of the usage? Since these requests do not require most of the pointer parameters is it such that only provided parameters are included in the validation?

Thanks  
Gary

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Yes, this is a good break point.

Also, the doc type is documented as 2 for the P3 driver, although it was 1 in the RD.

Talk to you tomorrow.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Please help me understand the scenario. Since the P3 driver has a non-CDL permit, yet the CSOR is for a CDLIS = Y, is the expectation that AI is creating a CDL for the driver or a permit?

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

If AI cannot add a pointer with a Pseudo SSN, you can add Driver G with Assigned SSN.

Let me know if you have any question.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Yes, this is a good break point.

Also, the doc type is documented as 2 for the P3 driver, although it was 1 in the RD.

Talk to you tomorrow.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Please help me understand the scenario. Since the P3 driver has a non-CDL permit, yet the CSOR is for a CDLIS = Y, is the expectation that AI is creating a CDL for the driver or a permit?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

In the F4 instructions it depicts both the pointer SSN and duplicate SSN as 111999999:

- Driver Social Security Number (DDVSS6) = 111999999
- Duplicate Driver Social Security Number (DDVSS8) = 111999999

Can I assume the DDVSS6 should still be the substitute SSN?

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

**Cc:** Mina Peters, AK Dept. of Administration <[mina.peters@alaska.gov](mailto:mina.peters@alaska.gov)>; Singaraju, Sruti <[ssingaraju@aamva.org](mailto:ssingaraju@aamva.org)>  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Gary,

There seems to be a typo in the Master Spec regarding the below issue that you have brought up ( below is CD04 example and there is a similar discrepancy for CD03 as well).

### CDL1.2.2.3 Data Look-up Errors

It should say Step 4 not Step 3, also it should be Requirement CD04.LKUP.SB.0500 instead of CD03.RTRV.500

CD04.LKU P.SB. 0500	Driver License Number (DDLNUM)	CLMF-CODE-DLN-CURR Format=Alpha- numeric Size=25	See step 3 above		
---------------------------	--------------------------------------	--	------------------	--	--

1. Search for credential using Driver License Number (DDLNUM).
2. If the record is not found, then the SOR must issue an error (see Error Text for CDL1.LKUP.SB.0100 in table below).
3. If only one CDLIS record is retrieved, the SOR should return the History information related to the CDLIS record.
4. If only one non-CDLIS record is retrieved,
  - 4.1 If the SOI is a CDLIS-only Participant, the SOR should follow existing CDLIS guidelines related to transmission information
  - 4.2 If the SOI is a S2S State, the SOR applies additional filters if the SOI populated additional fields on the Driver License request matches the information on the SOR's record then the SOR should respond with the information otherwise it should generate an error message. (see Error Text for CD03.RTRV.500 in table below).

It should say Step 7 not Step 6, also it should be Requirement CD04.LKUP.SB.0600 instead of CDL1.LKUP.SB.0600

CD04.LKU P.SB. 0600	Driver License Number (DDLNUM)	CLMF-CODE-DLN-CURR Format=Alpha- numeric Size=25	See step 6 above.		
---------------------------	--------------------------------------	--	-------------------	--	--

- 7.2 If the SOI is a S2S State, the SOR should apply additional filters. After the application of the filters:
- 7.2.1 If no matches remain after the additional filters have been applied, the SOR must generate an error CDL1.LKUP.SB.0600) in table below.
- 7.2.2 If only one match remains, the SOR should return the History information associated with this cre
- 7.2.3 If multiple matches remain, the SOR should rank the records first on State Document Type in the f for Base Driver License, State Identification Card. Then rank the records based on Real ID Indicato with REAL ID rules, State custom rules. Lastly, rank the records based on the most recent Issuance History of the credential with the highest rank order.

I just wanted to let you know that for CDL records, for finding a match, other than the DLN, any other data elements shouldn't be compared (no additional checks must be done).  
Please let me know if this helps.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Hi Siri

I am going to need some direction on validation rules associated with the error REQUESTED RECORD NOT FOUND – ADDL INFO MISMATCH (#1).

Section *CD03.3.2.5 Retrieved Records Validation* has no definition for the rule other than “See step 3 above”, of which I cannot find.

Also what is the distinction between error (#1) versus (#2). Per the test script, I see these errors can occur for SB and SG although it just seems to be documented for SG. Can you clarify the scope of the usage? Since these requests do not require most of the pointer parameters is it such that only provided parameters are included in the validation?

Thanks  
Gary

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

This email comes from an external source, so remember, Think Before You Click!

Gary,

If AI cannot add a pointer with a Pseudo SSN, you can add Driver G with Assigned SSN.

Let me Know if you have any question.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Sure Gary, NP.

Can we start Driver G while you are fixing Driver F?

Please let me know.

Thanks,  
Asma

CD04.LKU P.SB. 0500	Driver License Number (DDLNUM)	CLMF-CODE-DLN-CURR Format=Alpha- numeric    Size=25	See step 3 above				x	REQUESTED RECORD NOT FOUND – ADDL INFO MISMATCH (#1)
---------------------------	--------------------------------------	---	------------------	--	--	--	---	--

1. Search for credential using Driver License Number (DDLNUM).
2. If the record is not found, then the SOR must issue an error (see Error Text for CDL1.LKUP.SB.0100 in table below).
3. If only one CDLIS record is retrieved, the SOR should return the History information related to the CDLIS record.
4. If only one non-CDLIS record is retrieved,
  - 4.1 If the SOI is a CDLIS-only Participant, the SOR should follow existing CDLIS guidelines related to transmission of non-CDLIS pointers History information
  - 4.2 If the SOI is a S2S State, the SOR applies additional filters if the SOI populated additional fields on the Driver History Request (SB) Message. If all the additional information on the request matches the information on the SOR's record then the SOR should respond with the History of the credential otherwise it should generate an error message. (see Error Text for CD03.RTRV.500 in table below).

CD04.LKU P.SB. 0600	Driver License Number (DDLNUM)	CLMF-CODE-DLN-CURR Format=Alpha- numeric    Size=25	See step 6 above.				x	REQUESTED RECORD NOT FOUND - ADDL INFO MISMATCH (#2)
---------------------------	--------------------------------------	---	-------------------	--	--	--	---	--

- 7.2

If the SOI is a S2S State, the SOR should apply additional filters. After the application of the filters:
- 7.2.1

If no matches remain after the additional filters have been applied, the SOR must generate an error response (see Error Text for CDL1.LKUP.SB.0600) in table below.
- 7.2.2

If only one match remains, the SOR should return the History information associated with this credential.
- 7.2.3

If multiple matches remain, the SOR should rank the records first on State Document Type in the following order: Driver License, Permit for Base Driver License, State Identification Card. Then rank the records based on Real ID Indicator in the following order: Conformant with REAL ID rules, State custom rules. Lastly, rank the records based on the most recent Issuance Date. The SOR should then return the History of the credential with the highest rank order.

This email comes from an external source, so remember, Think Before You Click!  
Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Yes, this is a good break point.

Also, the doc type is documented as 2 for the P3 driver, although it was 1 in the RD.

Talk to you tomorrow.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

Gary,

Sure. If you are ready today, just let me know and we can continue.

Thursday and Friday, I am out of office.

Thursday, Siri can help you till 1:30 PM (EST) and Friday you can continue with her till 3:30 PM (EST).

Let me know if you have any questions.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPSS2). But since the new pointer is non-CDLIS, only the last 5 digits (BPSSD) should be populated with a blank SSN (DDVSS6), correct?

**Cc:** Mina Peters, AK Dept. of Administration <[mina.peters@alaska.gov](mailto:mina.peters@alaska.gov)>; Singaraju, Sruti <[ssingaraju@aamva.org](mailto:ssingaraju@aamva.org)>  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!  
Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

In the F4 instructions it depicts both the pointer SSN and duplicate SSN as 111999999:

- Driver Social Security Number (DDVSS6) = 111999999
- Duplicate Driver Social Security Number (DDVSS8) = 111999999

Can I assume the DDVSS6 should still be the substitute SSN?

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPSS2). But since the new pointer is non-CDLIS, only the last 5 digits (BPSSD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

This email comes from an external source, so remember, Think Before You Click!  
Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

This email comes from an external source, so remember, Think Before You Click!  
[Gary,](#)

If AI cannot add a pointer with a Pseudo SSN, you can add Driver G with Assigned SSN.

Let me Know if you have any question.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

This email comes from an external source, so remember, Think Before You Click!  
Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

Gary,

Sure. If you are ready today, just let me know and we can continue.

Thursday and Friday, I am out of office.

Thursday, Siri can help you till 1:30 PM (EST) and Friday you can continue with her till 3:30 PM (EST).

Let me know if you have any questions.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

This email comes from an external source, so remember, Think Before You Click!  
Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

In the F4 instructions it depicts both the pointer SSN and duplicate SSN as 111999999:

- Driver Social Security Number (DDVSS6) = [111999999](#)
- Duplicate Driver Social Security Number (DDVSS8) = [111999999](#)

Can I assume the DDVSS6 should still be the substitute SSN?

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

This email comes from an external source, so remember, Think Before You Click!

I'm thinking it should be a CDLIS = N but will need to confirm this with our team. Is it ok if we continue tomorrow with this? By that time, I'll have the answer.

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Please help me understand the scenario. Since the P3 driver has a non-CDL permit, yet the CSOR is for a CDLIS = Y, is the expectation that AI is creating a CDL for the driver or a permit?

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

Gary,

If AI cannot add a pointer with a Pseudo SSN, you can add Driver G with Assigned SSN.

Let me know if you have any question.

Thanks,

Asma

**Cc:** Mina Peters, AK Dept. of Administration <[mina.peters@alaska.gov](mailto:mina.peters@alaska.gov)>; Singaraju, Sruti <[ssingaraju@aamva.org](mailto:ssingaraju@aamva.org)>

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Please help me understand the scenario. Since the P3 driver has a non-CDL permit, yet the CSOR is for a CDLIS = Y, is the expectation that AI is creating a CDL for the driver or a permit?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

This email comes from an external source, so remember, Think Before You Click!  
[Gary,](#)

If AI cannot add a pointer with a Pseudo SSN, you can add Driver G with Assigned SSN.

Let me Know if you have any question.

Thanks,  
Asma

**Cc:** Mina Peters, AK Dept. of Administration <[mina.peters@alaska.gov](mailto:mina.peters@alaska.gov)>; Singaraju, Sruti <[ssingaraju@aamva.org](mailto:ssingaraju@aamva.org)>  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

I got an returned error SSN AND SSN TYPE MUST BE CONSISTENT.

Maybe I misunderstood the test instruction. It depicted SSN 111999999, however, I gather I should not have changed the SSN and instead only changed the name fields. Is that correct?

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

This email comes from an external source, so remember, Think Before You Click!

Gary,

If AI cannot add a pointer with a Pseudo SSN, you can add Driver G with Assigned SSN.

Let me Know if you have any question.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Please help me understand the scenario. Since the P3 driver has a non-CDL permit, yet the CSOR is for a CDLIS = Y, is the expectation that AI is creating a CDL for the driver or a permit?

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPESS2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESSD) should be populated with a blank SSN (DDVSS6), correct?

**To:** Syeda, Asma <[ASyeda@aamva.org](mailto:ASyeda@aamva.org)>  
**Cc:** Mina Peters, AK Dept. of Administration <[mina.peters@alaska.gov](mailto:mina.peters@alaska.gov)>; Singaraju, Sruti <[ssingaraju@aamva.org](mailto:ssingaraju@aamva.org)>  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL, System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

This email comes from an external source, so remember, Think Before You Click!  
Gary,

If AI cannot add a pointer with a Pseudo SSN, you can add Driver G with Assigned SSN.

Let me know if you have any question.

Thanks,  
Asma

**Cc:** Mina Peters, AK Dept. of Administration <[mina.peters@alaska.gov](mailto:mina.peters@alaska.gov)>; Singaraju, Sruti <[ssingaraju@aamva.org](mailto:ssingaraju@aamva.org)>

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

In the F4 instructions it depicts both the pointer SSN and duplicate SSN as 111999999:

- Driver Social Security Number (DDVSS6) = 111999999
- Duplicate Driver Social Security Number (DDVSS8) = 111999999

Can I assume the DDVSS6 should still be the substitute SSN?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Cc:** Peters, Mina L (DOA); Singaraju, Sruti  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Please help me understand the scenario. Since the P3 driver has a non-CDL permit, yet the CSOR is for a CDLIS = Y, is the expectation that AI is creating a CDL for the driver or a permit?

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Cc:** Peters, Mina L (DOA); Singaraju, Sruti  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

To avoid any confusion, I think you can use the values same as that were present on the NA that AI received.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

In the F4 instructions it depicts both the pointer SSN and duplicate SSN as 111999999:

- Driver Social Security Number (DDVSS6) = 111999999
- Duplicate Driver Social Security Number (DDVSS8) = 111999999

Can I assume the DDVSS6 should still be the substitute SSN?

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPSS2). But since the new pointer is non-CDLIS, only the last 5 digits (BPSSD) should be populated with a blank SSN (DDVSS6), correct?

**To:** Syeda, Asma <[ASyeda@aamva.org](mailto:ASyeda@aamva.org)>  
**Cc:** Mina Peters, AK Dept. of Administration <[mina.peters@alaska.gov](mailto:mina.peters@alaska.gov)>; Singaraju, Sruti <[ssingaraju@aamva.org](mailto:ssingaraju@aamva.org)>  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Attachments:** AAMVA Fraud Awareness Call.ics

I hope you can join us for our next fraud awareness call. We will be highlighting several recent fraud investigations and we will have a presentation from Allen Atamer, Principal Engineer for the Harmari online investigative resource. Allen will showcase the Harmari investigative tool that can be used to find internet vehicle fraud that may be taking place in your jurisdiction. If you have agenda items or would like others from your office invited to this call, please let me know.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

---

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPESS2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Cc:** Peters, Mina L (DOA); Singaraju, Sruti  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

---

**From:** Gary Tancik [mailto:Gtancik@resdat.com]

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Yes, this is a good break point.

Also, the doc type is documented as 2 for the P3 driver, although it was 1 in the RD.

Talk to you tomorrow.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Please help me understand the scenario. Since the P3 driver has a non-CDL permit, yet the CSOR is for a CDLIS = Y, is the expectation that AI is creating a CDL for the driver or a permit?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

This email comes from an external source, so remember, Think Before You Click!

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

This email comes from an external source, so remember, Think Before You Click!

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

I ran G3 again and received the confirmation along with NA, whereby the duplicate reason code = 7.

Yes, we can move on to Driver G. I think G1/2 is done, and Ai has to add the pointer? If so, please go ahead.

Thank you

This validation will require a fix, about an hour. Would you prefer to move onto another Driver F test, or perhaps revisit Driver G?

Ok, F5 looked good but for F6, I received 'ERROR PROCESSING REQUEST' instead of 'REQUESTED RECORD NOT FOUND – ADDL INFO MISMATCH (#1)'.

Could you please take a look?

Thank you

Ok, UG sent and I think you should have received the NE now. Shall I go ahead with F5.

Thank you

Gary,

To avoid any confusion, I think you can use the values same as that were present on the NA that AI received.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

In the F4 instructions it depicts both the pointer SSN and duplicate SSN as 111999999:

- Driver Social Security Number (DDVSS6) = 111999999
- Duplicate Driver Social Security Number (DDVSS8) = 111999999

Can I assume the DDVSS6 should still be the substitute SSN?
